

Gnome Design Ltd. is empowering KLUSA project team

About the KLUSA product

The multi-project and portfolio management product KLUSA from OPUS Business Solutions GmbH is used by enterprise companies for production and R&D projects. KLUSA is a fully web based solution which offers the core elements of project planning: scheduling, work breakdown structure, resource planning and budgeting. However, project management is more than that.

A successful multi-project management using KLUSA includes risk management, quality management and document management as well as reporting and controlling features. As an option, its financial tracking features automatically calculates the project progress based on accounted hours. Expenses and costs can also be determined in this way.

The following customers are already using KLUSA successfully in their companies since longer time. The range goes from medium sized companies to multinational corporations, from semiconductor and chip production industry to insurance sector:

Long-term partnership with Gnome Design Ltd.

Since 2008 Gnome Design Ltd. from Romania is cooperating with the OPUS Business Solutions GmbH from Bavaria, Germany as their main partner in the area of software development and customer support for the KLUSA product.

Within this long-term partnership our team is responsible for developing, designing and supporting this Microsoft .NET technology based system. During the ongoing session our project managers are taking part in coordination, design and execution, and also act as an intermediary between the virtual teams, helping them with consultation and technical solutions.

The Gnome team is also monitoring the delivered software's quality and supporting it at the following companies: Infineon AG, Intel Mobile Communication GmbH, Lantiq GmbH & Co.KG, Jenoptik AG, Swisslife AG.

We at OPUS GmbH, Germany, are happy about our good and successful partnership with gnome Design. Since several years we have been cooperating with gnome as their customer in the area of software development for our product KLUSA (www.klusa.com).

Fast and smooth communication and software development on a constantly high quality level are key criteria for us. Based on our positive experience we will expand our cooperation with gnome in the future, and we are looking forward to working and developing complex state-of-the-art software with our colleges at gnome Design.

Martin Riebl, Product Manager KLUSA
